

Physical Development

PE- MONDAY AFTERNOON

Team games- catching and throwing and negotiating spaces, as they move around large and small areas. Using different sized balls which are thrown at different speeds. Can they use just one hand to catch the ball?

Communication and Language

We will be learning to:

- Develop our questioning skills
- Use how and why questions
- Confidently have a conversation with others
- Talk about our own experiences
- Respond to questions in full sentences
- Retell stories learnt in school and at home

Personal, Social and Emotional Development

The children will be creating their own vehicles, sharing ideas and working together to solve problems and challenges as they occur. The children will continue to develop their team skills and turn taking/sharing through our new resources and games which they will be able to use outside.

Literacy

Our books for this half term are all based around our focus of **Trucks, Travel and Technology**. We will be unpicking the keys books looking at the characters, settings and text used within them. With your support the children have made amazing progress with their reading and we ask that you continue to do this with them at home. New Phonics sounds will be learnt daily which the children will then apply in their reading and writing. We are so proud of the children's writing and how much progress they have made, to build on this we will be adding connectives into our sentences using 'and/because' creating complex sentences.

Foundation Stage 2

Spring Term 2:

Trucks, Travel and Technology

Learning together at home:

Every opportunity is a learning opportunity, so we would love you to support your children learning as we head into the second part of the academic year. These areas of learning will all incorporate a focus of transport, the use of the internet and how to stay safe online. We are also interested in the places you have visited and how you travelled there. We look forward to having a fantastic second half of the school year like we did the first.

Numeracy

Wow we are really developing our knowledge of teen numbers and are starting to look at bigger numbers now from 16-20! The children will continue to secure their understanding and use of numicon shapes, 10's frames, 10' and one's grids and number blocks. We will also be exploring measurements including: distance, size and weight. How far do we travel to school? What is the furthest we have ever travelled? How long will it take us to travel to space?

Books we will be reading this half term:

Once upon a time online
Whatever next
Here We Are
All Aboard for the BoBo Road

Expressive Arts and Design

We will be creating our own vehicles and means of transport which the children can then play with in the small world area. IF YOU HAVE ANY JUNK MODELLING RESOURCES AT HOME PLEASE COULD YOU BRING THEM IN! This could include cardboard tubes, yoghurt pots and other recuclable materials.

Knowledge and Understanding of the World

We will be focusing on technology and how this is part of our lives. Within this we will be looking at how technology works, the importance of online safety and programming Bee Bots. . . . which is great fun!!! The children will continue to develop their ability to use the IPads, as new App's and games will be installed for the children to use.
